

Lines of Japanese Black Wagyu

Jerry Reeves (2017)

History of Imports

200 Cows and 30 Bulls

First Wagyu Semen into Canada 1974

- Semen from Itotani 7th was imported in 1974 for research purposes by Canadian Scientist.
- Twenty three units of this bull's semen were discovered in 1991.
- Two Purebred bulls resulted called Fame and Fortune.
- Descendants of Itotani 7th can be found in the Pure bred registry of the AWA

• Shigeshigetani 5	10	0.54
• Sanjirou	278	0.52

A large piece of raw beef, likely a brisket or similar cut, is shown. The meat is cut into several thick slices, revealing a marbled texture of red muscle and white fat. A small, white, rectangular label is placed on top of the meat. The label has handwritten text in black ink. The background is dark and out of focus.
