## **OUR QUEST TO EXCELLENCE**

It's been a privilege to be a part of the Wagyu family over the last eight years. I am still 100% committed to the betterment of the AWA serving as a board member for the past two years and we are still moving in the right direction to truly differentiate the Wagyu breed in the USA. We hope you will enjoy the diverse genetic offering we've put together. No expense has been spared and no corners have been cut when breeding, raising and or finishing our herd.

Our goal has always been to meet and exceed expectations when it came to the end product - "the meat". In order to achieve the best possible "meat" it starts with the health of a calf multiple months before it is born. We ensured all of our females were well nourished and the time pre-birth was just as important as post birth in our herd development. Investing in seasoned Wagyu consultants, cutting edge technology such as the Kuchida Camera to gather our own "real" carcass data. We then bought a diverse genetic steer population, as well as raising our own, to gather carcass data quickly to adjust our breeding, dietary and husbandry decisions. Grounded in fact and not opinion.

We also understood the need for the best possible genetic base to build from for consistency based on those facts. Please notice the steps we have taken, as our herd progressed, to engineer the best possible end product based on our experience. If you're looking for a compliment to your current program that is only one generation or less away from the ultimate success these prospects could fill your need!

On behalf of my entire family we thank you for your consideration and wish you the best of luck in your future developing the best "meat" available in the USA!

*Philip Bowman & Family*

## *auction management*

If you are looking for the crème de la crème of the Wagyu breed in North America, look no further. The genetics within this offering are without a doubt the most sought after individuals and lineages this breed has ever known. Whether you are looking for rare bloodlines, proven cow families, the best in phenotype or the “what’s hot” sire groups; this set will make you look no further. Not only has the base of this herd been the epitome of the most royal bloodlines this country has ever seen, it has proven itself to perform not only in the pasture but on the rail, in embryo transplant and semen collection and sales. When you start with the best it’s easy to finish with excellence and that is just what Bowman Farms has done. This offering has a piece that any type or size program will benefit from as Bowman Farms has excelled at every angle of the Wagyu industry. It is without a doubt that no matter what you take away from this program, it will only add tremendous value to your platform; take advantage of this offering to bring the success of every angle into your current state.

# TERMS & CONDITIONS

- All sales are final - no returns or replacements as this is a dispersion sale. Purchased Items must be paid before shipment can be made unless prior arrangements are made with the sales management (JDA).
- All attendees wishing to participate in the sale must be registered with the sales management and must obtain a buyers number.
- Absentee buyers & internet buyer payments can be wired to the sale management's custodial account before cattle are released to the buyer.
- All lots become the buyer's risk once purchased. After purchase, all costs are the buyer's responsibility. All costs for exporting lots are the buyer's responsibility.

## *Supplemental Information*

Any errors, updates, or changes in information contained in this catalog will be announced from the auction block and included in a supplement sheet on sale day. Announcements from the block take precedence over the catalog and any prior released information.

## *Sale Order*

All lots will sell in catalog order - any changes to this will be announced on sale day.

## *Genetic Disorders*

Animals are free by pedigree/or test - if they are carriers/affected this will be listed in the animal's pedigree information

## *Liability*

All persons attending the sale and related functions do so at their own risk. James Danekas & Associates, Inc., its employees, all sale representatives, plus all Bowman Farms and all facility representatives including The Lodge at Brier Creek representatives assume no liability, legal or otherwise, for any accidents, damages, or injuries that may occur.

## *herd health*

- Bowman Farms follows a strict protocol of the following vaccinations/worming at birth and every subsequent 6-month period:
  - Vira Shield, Triangle 10, Vision 7, and Wormer
  - All animals are up to date on all vaccinations/worming
- All mature bulls selling in the sale have been tested for Trich & breeding soundness. The virgin bull calves have not been tested for Trich nor have they undergone a breeding soundness evaluation. Any additional testing required for shipment is at the buyer's expense.
- A veterinarian will be on-site to help write any health certificates that may be required and/or schedule any additional test that may be needed.

## *Livestock Mortality Insurance*

Livestock mortality insurance will be available through the sales management on sale day if you wish to insure your investment.

With the many options available, it would be wise to insure your new purchase.

30 Day  
90 Day  
6 Months  
1 Year

Policies that work for every kind of investment.

## *Shipment of purchases*

The recommended hauler is:

**Lathrop Trucking 847-426-5009**

All costs involved with shipment is the buyer's responsibility and the buyer is responsible for making arrangements. All animals should be picked up from the Farm before April 10<sup>th</sup>. If this is not possible, please make arrangements with the seller and/or sales management to assist in setting up the best possible arrangement for your purchase

- SELLS OPEN - READY TO FLUSH

Hisako could be one of the most famous and sought after females in the US Wagyu business. Why, you ask? Not only is she made just right with perfect phenotype, she has celebrated bloodlines in her pedigree and is a classic breeding combination of both high marbling genetics coupled with exceptional growth genetics. Plus, she was bred by the best in the industry, the folks that know how to create and have the capability to create the strongest foundation genetics in the World; World K. Hisako made waves when she broke previous selling records in 2017 as she was featured as Lot 1 in the Muddy Flats sale selling for a whopping \$46,000. Since, both her progeny and embryos have followed in her footsteps topping sales throughout the country. Her balanced combination of bloodlines that feature rare and hardly seen All-Stars in her pedigree make her just about perfect to breed to any bull out there with exceptional results; she is what you call the perfect donor dam. Here is your chance to invest in the best, the proven and the rare genetic line-up found in Hisako! She is dual registered with both the American and Australian Wagyu Associations to add even more value to this celebrated individual. As a donor she's more than excelled - averaging 16-25 embryos in the last 5 IVF sessions. IVF has been the most successful as she has been sewn up from a previous prolapse.

- LOT 30 -

*Lot 2*

If you can't get the factory – acquire some of the best of its product. Hisako is graced with Hikari 2 to create an even more interesting pedigree. We establish even more marbling potential and superb carcass ability with this mating with the double bred Monjiro pedigree found in Hikari 2. Even more exciting is Hikari 2 adds the rarity of WK Okahana to the mix; she is an original World K import brought to the US in 1994. Very seldom do we see her this prominently in a pedigree and when we do her progeny are as hot as any; a daughter sold for \$17,500 in 2017 and her grandson sold for \$50,000 just this last year plus a Hikari 2 daughter sold for \$15,000 in 2020. Take home either a new herd bull that folks will be calling to acquire semen on or your next exciting donor that will also have your phone ringing off the hook for embryo orders.

*Hisako Pregnancies*

Combining one of the hottest cows in the Wagyu industry with one of the most exciting sires to date is just what was ordered up in these pregnancies. Hisako was our featured donor dam found in Lot 1 – the rare and balanced breeding, record breaking female that not only looks superb on paper but in person could be the best looking females the US Wagyu industry has ever seen. Itoshigenami is paired with her here and only brings proven high quality genetics to the table. His progeny too have and are still breaking selling records around the World including his direct son whose semen still sits as the highest selling semen in the World amongst all breeds selling for \$68,000 per unit. Itoshigenami, just like Hisako, carries exceptional marbling genetics with growth potential as well – very balanced and paired with Hisako could be a game changer!

Lot 7

Lot 8

A great thought was to pair the best of the best and that's what we have here. Sanjiro 3 is a full sib to Sanjiro but crushing him in the marbling department. Sanjiro 3 is currently the #1 Marbling bull in the country. Once again we have the famed Hisako and together, they're rock stars or like the Kim Kardashian and Kanye West of the Wagyu breed. Let's just put it this way, Sanjiro 3 progeny are hot, they sell for \$15,000, 12,500 and \$9000 (this is just in one sale this last year) and this exact mating (Sanjiro 3/ Hisako) sold for \$14,000 for a female pregnancy. Need anymore be said?

HISAKO - DAM OF LOTS 10 & 11

Lot 10

Another grand Hisako opportunity found in this herd sire! This bull will make anyone salivate as he is a direct son of the celebrated Hisako and his sire is Kousyun. We know the value that Hisako brings to this exciting party but take a look at Kousyun! His sire is Yasufuku 930; with only 8 registered offspring sired by Yasufuku 930 in the US, this makes Kousyun rare and his genetics highly sought after including a son that just sold for \$50,000 and a full sib to this mating selling for \$9000 this last spring. Yasufuku 930 has sired breed greats including Yasufuku Jr, a highly proven and esteemed sire for incomparable marbling capabilities. The herdsire prospect being offered here has all the potential to be the next "it" bull of the breed just based off the pedigree we see here plus not to mention the carcass potential!

Lot 11

This celebrated pedigree screams quality! Again we have the famed donor, Hisako gracing the pedigree but we bring in something that we haven't seen quite yet – Itozuru Doi TF151, the original. Itozuru Doi is known as a fabulous composite bull: 50% Tajima, 25% Fujiyoshi and 25% Kedaka line and TF151 is a Trait Leader for Marble Fineness EBV (+0.34) top 5% of the breed in the Australian BreedPlan. He's got an extra punch of growth and is known as the best marbling bull of the Fujiyoshi bloodlines. No matter how we find Itozuru Doi in a pedigree, it only adds tremendous value. In fact, almost all embryo matings that feature Itozuru Doi as the sire sell for \$1000 or more. To have a herdsire sired by Itozuru Doi and paired with Hisako is a dream come true and here you have it folks – making your Wagyu dreams a reality. Call the stud companies and go make a profit with this proven sire!

**HERD SIRE**

ESF MICHIFUKU P 614 016 - GRAND DAM OF LOT 13

## Lot 12

These two females here are built a little different with the result being very high quality but are both bred to the Itozuru Doi/Hisako mating found in Lot 11. Lot 12 is a product of the breed original import dam, Suzutani; a carcass specialist. Her sire features two super growth and maternal specialists, Itomoritaka and Itoshigefuji all going back to the Hikokura line created by Takeda Farms. Lot 13 brings another realm to the mix. Once again we see Itomoritaka, a leader in growth and maternal ability, as her direct sire. Her direct grand dam sold for \$14,000 in 2013 and is balanced with Michifuku here twice; you know the marbling potential is there to couple that growth. These two females would complement any program and their future progeny sired by Lot 11 is as rousing as any.

*Lot 14*

These two maternal sisters are bred to the exciting genetic mix (Itozuru Doi/Hisako) found in Lot 11. They themselves have a celebrated line-up as they're decedents of the great Fujiko. A little history lesson; Fujiko is a daughter of Okutani (one of the "original three" brought to the US by the World K group) and is a full sister to World K's Beijirou and Genjiro. The cloning rights for Fujiko sold for \$26,000 in public auction. WK Takazakura (breed original to the US) is blended with Fujiko to make the dam present in both of these available pedigrees. They're paired with WK Sanjirou (possibly the most influential sire of the Tajima line for superior proven carcass quality) and Hirashigetayasu (a pedigree that includes all three Westholme sires and adds another dimension of growth potential). Both are fantastic packages with the added benefit of their service sire as the icing on this irreplaceable lineup.

 BY BFC ITOZURU DOI 45F ET (FB38341) - **LOT 11**

## Lot 16

Two superb females but built a tad bit differently. Lot 16 is bred to the Lot 11 Itozuru Doi/Hisako combo and is the classic mix of high marbling coupled with growth. Lot 17 has a very balanced pedigree and both of these females go back to CHR Michisuru 089L on the bottom side and Lot 18 has a double dose as he's present on the top of her pedigree as well with Takazakura (great foundation sire known for extreme marbling ability). Also note, Lot 17 has a perfect combination of AA-10!

HISAKO - DAM OF LOTS 18 & GRAND DAM OF LOT 19

Lot 18

BFC SANJIROU 35F ET - DAM OF LOT 19

Another grand Hisako opportunity found in this herd sire! This bull will make anyone salivate as he is a direct son of the celebrated Hisako and his sire is Kousyun. We know the value that Hisako brings to this exciting party but take a look at Kousyun! His sire is Yasufuku 930; with only 8 registered offspring sired by Yasufuku 930 in the US, this makes Kousyun rare and his genetics highly sought after including a son that just sold for \$50,000 and a full sib to this mating selling for \$9000 this last spring. Yasufuku 930 has sired breed greats including Yasufuku Jr, a highly proven and esteemed sire for incomparable marbling capabilities. The herdsire prospect being offered here has all the potential to be the next "it" bull of the breed just based off the pedigree we see here plus not to mention the carcass potential!

**HERD SIRE**  
*prospect*

We've seen this featured dam earlier and she's even more exciting when we see she's been paired with Kitateruyasudo to make Lot 19. That's right, the dam of this herd sire prospect is the hottest combo we've seen – Sanjiro 3 and Hisako. This combo is the Kim Kardashian and Kanye West of the Wagyu breed. This sexy duo brings together the two most sought after individuals to date. Sanjiro 3 is a full sib to Sanjiro but crushing him in the marbling department. Sanjiro 3 is currently the #1 Marbling bull in the country. Once again we have the famed Hisako and together, they're rock stars. Let's just put it this way, Sanjiro 3 progeny are hot, they sell for \$15,000, 12,500 and \$9000 (this is just in one sale this last year) and this exact mating (Sanjiro 3/Hisako) sold for \$14,000 for a female pregnancy. Hisako herself sold for \$46,000 and has a pedigree that's as balanced as can be but holds the cards for rare and celebrated bloodlines. This is also mixed with Kitateruyasudo who was imported by the Westholme groups and is a foundation sire better known for excellent maternal traits – a highly important trait in any beef breed. Take this prospect home or get him into the export facility ASAP as he could be the next international Wagyu sensation.

# Kitateruyasudoï 1133G

## Lot 20

This superb herdsire prospect is and has been geared for complete success. First of all, his pedigree is flawless. His dam, MFC 636D, was purchased out of the Muddy Flats dispersion and the buyer is a very influential European Wagyu breeder located in Germany. She was selected for her incomparable marbling genetics. She's stacked with the best this breed has seen with Itoshigenami, a bull considered to be a game changer in the breed Worldwide, as her direct sire, a past top marbling bull, Itozuru Doi, on the bottom of her pedigree coupled with a Japanese marbling phenom, Yasufuku Jr, as her dam's direct sire. The female represented here is what this breed is all about; fantastic marbling genetics. Lot 20's direct sire is Kitateruyasudoï, who also isn't too shabby in the marbling department as he is a top marbling bull in the US but brings a very important trait to the mix; size. That's right, Lot 20 checks all the boxes for positive traits and the most important of all, marbling, is checked so many times that the carcass potential of his progeny is huge. He's ready to go to work and is also sitting in a collection facility ready for you to just make the move to allow him to become the next hot go to sire of the breed.

MFC MS ITOSHIGENAMI 636D - DAM OF LOT 20

These boys are just the same as Lot 20 on their maternal side as their dam would be a full sib to Lot 20's dam, the Sanjiro 3/Hisako combo. They on the other hand are sired by the legendary Kitaguni Jr. - 37% Tajima, 25% Itozakura, and 12.5% each Kedaka, Shimane and Okayama based upon the 16x16 Analysis. He brings to the table a bit more growth without taking away pursued marbling in a pedigree giving these prospects the potential to be high performing individuals and in the beef industry, this is a must.

VT YASUTANI 1012 F09 ET - SIRE OF LOTS 24 & 25

HISAKO - DAM OF LOT 26 & GRAND DAM OF LOTS 24 & 25

Just when you thought the pedigrees couldn't get any hotter – we add yet another rock star to the mix. That's right, again we have a Sanjiro 3/Hisako combo female as the featured dam of this pedigree; a fantastic duo. It doesn't stop just there because we add in the extraordinary value of "F09" as the direct sire in these pedigrees. VT Yasutani F09 ET is newer on the scene but his value was established as a young calf when he broke records selling for \$40,000 in 2018 – the highest selling fullblood black bull to date at that time. He's a AA-10 combo with one hell of a pedigree. His dam is sold for \$9500 and his full brother sold for \$25,000 in 2017. He's bred to be a marbling machine as his pedigree includes Itoshigenami, Tanifuku-Doi and Sanjiro. His progeny have shown carcasses that are far above prime with beautiful marbling. This pedigree is as good as they come and there's a female and herd sire prospect opportunity, both with superb SCD and Tenderness outcomes.

No need to introduce this dam – Hisako is all that needs to be mentioned – it's like a mic drop. Just the mention of this name should stop all breeders in their path. Here we have a Kitaguni Jr/Hisako daughter. Donor Alert!!! Hisako is paired with the foundation sire Kitaguni Jr. He's 37% Tajima, 25% Itozakura, and 12.5% each Kedaka, Shimane and Okayama based upon the 16x16 Analysis and has proven himself to be a TraitLeader for growth as well as Marbling (a perfect combination). You won't find this tabulation anywhere else and its benefits are endless.

# Polled Genetics

HISAKO - DAM OF LOTS 27 - 29

BAR R POLLED ZURUTANI D64 - SIRE OF LOTS 27 - 29

OK...this can't be real; polled influenced Hisako genetics? Yes, you can pinch yourself to prove you aren't dreaming. This is the real deal – today's demand paired with the best cow this breed has presented. These two boys are sons of the legendary Hisako who needs no introduction and are sired by "D64" who is a homozygous polled bull; Lot 27 is polled himself. Bar R Polled Zurutani D64 is a son of 52Y. 52Y is the famous sire that has had a son sell for \$80,000, a daughter sell for \$64,000 and just recently had a daughter sell for \$42,500 in the Bar V dispersion sale. In a GrowSafe trial, "D64" ranked #3 in residual feed intake making him a top performing individual. In the Australian BreedPlan, "D64" has fabulous carcass trait EBVs including +2.0 for Ribeye Area and +0.8 for Rump Fat. Again...this is not a dream even though it seems like it could be. Lot 29 is a polled Hisako daughter...again, you are not dreaming, this is a reality. The value here is tremendous and the breeding capability is a game changer for the polled industry to incorporate the genetics of such an important dam to the polled Wagyu gene pool which is small and limited. Just think of who you'll flush and breed her to and the value that will be created. The excitement is almost too much to handle so you may want to make sure you don't tell too many people about this opportunity as there are only a few and you'll want to keep it all to yourself.

# Kato 810F

## Lot 30

Hello Handsome! We would like to introduce you to the current highest selling fullblood black Wagyu bull in the United States – Kato 810F. Even though this bull is young with a huge future ahead of him, his pedigree has some major history. The dam of this bull is a direct daughter of WK Okahana; she's an original World K import brought to the US in 1994. Very seldom do we see her this prominently in a pedigree and when we do her progeny are as hot as any. Her direct son is Hikari 2 and his progeny have averaged above many other sire groups and just this last year a daughter sold for \$15,000. Back in 2017 a group from Canada made the long trip in search of her direct progeny; this program is well-established and knows the breed as well as any, especially the powerful genetics of WK Okahana. They purchased Lot 30's dam for \$17,500. There was very limited progeny available on this female and because of this, Lot 30 is truly a gem; he sold for \$50,000. His sire also is quite impressive as he a direct product of Yasufuku 930. With only 8 registered offspring sired by Yasufuku 930 in the US, this makes Kousyun rare and his genetics highly sought after. A full sib to Lot 30 sold for \$9000 this last spring and Kousyun progeny are hard to find. Yasufuku 930 has sired breed greats including Yasufuku Jr, a highly proven and esteemed sire for incomparable marbling capabilities. At the time of the original purchase of this bull, he was sent directly to a collection site and tested positive for Blue Tongue and Leukosis so all semen collected on this bull has and will be approved for conventional use. To make this even more valuable, his dam just recently deceased making her lineage even that more rare. If you are serious about Wagyu genetics and want the best of the best then pay attention and don't let this one slip away.

- CONFIRMED PREGNANT DUE 4/20/2021 SIRED BY BARV KOUSYUN KATO 81 OF ET (FB37086) - LOT 30

# Kikutnami 3346Z

## Lot 35

As we get deeper into this catalog the offering gets more exciting and exceptional. Lot 35 has been referred to as "rare genetics". To this day, she still holds the record for the highest selling fullblood Wagyu female in any auction in the US. In 2017 she sold for a whopping \$59,000. Her genetics were worth every penny as her direct sire is TF146. He is an extremely rare sire who is known for exceptional marbling and marbling fineness and who has not only limited progeny in the US but also whose genetics are seldom found. This bull is so popular in Japan that it is said that more than 50% of Wagyu bulls in Japan carry his blood. TF146 is a direct product of a cow legend as his direct sire, Tanifuku-Doi's direct dam is known in Japan as "The Hyogo Cow". She is accredited for putting size into Tajima cattle, the most famous bloodline in Japan. TF146 is the only bull exported from Japan with those genetics. TF146 became ill shortly after his arrival into the United States and only a few hundred units of quality semen were collected. The semen is hard to find and even more difficult to acquire. 3346Z's dam is a double bred Itoshigenami; this only adds to the marbling power of this already astonishing female. Itoshigenami is the sire of the hottest bull in the Wagyu industry worldwide, Itoshigenami Jr, who himself has sired some of the highest priced individuals setting records in Australia. Be the one with some bragging rights and sleep tight knowing you are the sole owner of genetics that are astounding. She's ready to enter into any embryo transplant program as she has recently tested negative for Blue Tongue, Leukosis & Brucellosis.

# — Kikutnami 3346Z Embryos & Pregnancies —

TBR MS KIKUTNAMI 3346Z - DAM OF LOTS 36 - 38

BFC ITOZURU DOI 45F ET - LOT 11 - SIRE OF LOTS 36 - 38

Have you ever wondered what it would be like to take the two hottest cows in the Wagyu breed and mix them together with a sprinkle of one of the most important and valuable sires ever known to Wagyu? Well, it's been done and ready to take out of the oven this spring. These pregnancies feature Hisako (Lot 1) and Kikutnami (Lot 35) with the original Itozuru Doi who is so valuable if he's found in embryo matings they typically sell for \$1000 or higher per embryo. If you want an all-star team, this mating is the one for you and there are three so have at it and make everyone flock to your program for the best.

LMR KITAGUNI 1441Y - SIRE OF LOT 39

The top selling female in US history graces this pedigree as the featured dam; here is her AA – 9 combo daughter! No need for anymore introductions as Lot 36 "3346Z" is a household name within the Wagyu genetics circuit. This direct daughter is sired by no other than LMR Kitaguni 1441Y, who in the 2019 LMCC Sire Performance Study, 1441Y is the highest marbling sire, above all the other sires we have studied, including Yasufuku Jr, his father, Kitaguni Jr. 1441Y has been in the Top 1% of all Wagyu sires studied (genomics included) for Marble Score EBV, Birthweight EBV, and Marble Fineness EBV. He packs a powerful punch to this already celebrated dam as well as a slew of data to solidify the mating even further.

Lot 40

Again we take the two hottest females of the breed (Hisako – Lot 1 and Kikutnami - Lot 35) and put them into one pedigree. That's right...the sire of these full siblings is a direct son of Hisako and their direct dam is Kikutnami herself. Hisako is coupled with LMR Toshiro 1-3 to create this fantastic sire seen here. LMR Toshiro 1-3 has been a Trait Leader among all Wagyu Sires outside of Japan. With accuracy figures of 80%+, he's ranked in the Top 1% of the breed for Carcass Weight EBV, Top 2% for 400-day Weight EBV and 600-day Weight EBV according to the October 2019 BREEDPLAN Report. He also excels in Milk and REA. Again we find ourselves surrounded by the A team and other players bringing even more value to make this an unreal tabulation.

*Lot 44*

We already know the amazing value found in Lot 35 – Kikutnami. She is the featured dam of these pedigrees. The pedigree is so rare and influential that making it appear twice in a pedigree is unfathomable but it's been done. Good luck finding this anywhere else; a double bred Kikutnami. If this isn't a mic drop then one doesn't exist. These two herd sire prospects are bulls you only dream about and here we have them for you to make your dreams become a reality.

TBR KIKUTNAMI 4051A - SIRE OF LOT 48

## Lot 47

More fabulous opportunities to take home the valuable genetics of Kikutnami - Lot 35! If you remember, this is the female stacked with rare genetics and that holds the title for the highest selling female to date in the US. In this dynamic mating, she's paired with Itomichi 1/2 in Lot 47. Itomichi 1/2 is a powerhouse and will add size and dimension to pedigree without taking away from the most sought after Wagyu trait; marbling. In Lot 48 we shake it up a bit and find the sire to be a full sibling to Kikutnami - Lot 35. He is paired with Itohana 2 who also does the same; increases growth performance plus compliments marbling. These two pedigrees are classically balanced and offer huge value found in the Kikutnami pedigree.

# Yasutani 1012 F09

## Lot 49

In the state of Vermont in the fall of 2018 history was made. A young bull calf, a product of embryo transplant, was auctioned off and sold for an amount that was the highest selling price for a fullblood black bull. This calf, who was still at the side of his recip mother at the time, sold for \$40,000. At his young age this bull had stellar phenotype but what made him so special and valuable are the building blocks behind him. First, his DNA carries a AA for SCD and a 10 for Tenderness – the very best. Next, His dam is as stellar as any as she's sired by the great WK Sanjiro who may be considered one of the very best marbling Wagyu sires to date and also most proven. His full brother, Sanjiro 3, is currently the #1 Marbling bull and carcass king in the US which solidifies these genetics. This dam sold for \$9500 in 2017 and still is a highly respected donor dam. His direct sire, TF Yasutani, only screams quality. He's bred to be a marbling machine as his pedigree includes Itoshigenami, Tanifuku-Doi and Sanjiro. Lot 49's full brother sold for \$25,000 and Lot 49 only continues on the royal path of this highly admired mating. Progeny of Lot 49 have expressed only exceptional carcass outcomes thus far with his career really only just getting started. We can't make pedigrees like this anymore so now is the time to add his genetics and the great building blocks behind into your program or be left in the dust.

VT YASUTANI 1012 F09 ET - SIRE OF LOT 52A

If you can't get the bull himself then here is a daughter of Lot 49 who sells alongside her dam in Lot 52. Her dam is as balanced bred as any as her pedigree is a fantastic mix of high marbling and growth brought forward through well-established foundation sires. Plus, she stems from the great Fujiko cow family – Fujiko was the first fullblood black Wagyu female born in the US as her dam, Okutani was one of the three original cows imported from Japan. Lot 53 has a beyond stellar pedigree. Make sure you have yourself a special donor paddock cause these girls belong there.

- **52A** - HEIFER CALF (BFC 49H) BORN 11/25/2020 Sired by VT YASUTANI 1012 F09 ET (FB34696) - **LOT 49**
- SELLS OPEN - READY TO BREED OR FLUSH

OK...if you think Donnie and Marie are the "it" brother and sister duo you obviously haven't seen these two calves sired by "F09" – Lot 49. Here are to paternal siblings that would make any pretentious breeder interested. The first calf sire by F09 is Lot 53. Never before have genetics as superb as these been offered! Just think, in one breeding season with this herd sire prospect, you can put your program in a whole new accelerated direction to success. Turn him out after he matures or get him right into a collection facility. If you're smart you'd get him collected for export ability as the World industry would salivate to incorporate this lineup into breeding programs. The dam of Lot 53 is carrying the rare genetics of Hanshoku on top of the marbling master sire, 068. This bull is hotter than any boy band from both the 80's and 90's! The dam of Lot 54 is dynamic as their sire as she's a product of Kikuyasu 400 whose semen has sold for over \$1000 per unit and Yojimbo who has been a famous sire who topped the Lone Mountain Cattle Company sale when he sold. If you were brave you buy them both and create a stronger foundation than any to build around.

# Ms Kikuhana W02

## Lot 55

There are certain cows in every program that consistently excel; they don't miss a beat. Lot 55 is one of these proven donors as her progeny have excelled each and every time. Her sire is the 100% Tajima, TF Terutani, who is somewhat rare in the US – TF Terutani 40 has only 124 offspring in the US today, as compared to Kitateruyasu Doi with 147 in this country and 3812 in AU. TF Terutani is out of Kikuteru Doi of the Kikumi Doi family. Along with his half-brother, Terunaga Doi, they have achieved higher Marbling EBV's by Australian standards than the rest of their Kikuteru Doi siblings. Terunaga Doi produced Kitateruyasu Doi as his only offspring, who contributes strongly in the pedigrees of the sires with the highest marbling scores in Australia today. Marbling credit should also be given to Terutani's dam, lesser known Tanifuku, out of Yasutani Doi. She was also sister to Yasufuku 930 and aunt to Suzutani. Another sister was Yoshimi 3, also out of Yasutani Doi, who was the dam of Kitateruyasu Doi. The bottom side of Lot 55's pedigree balances this whole equation out with adding both growth and maternal strength making this female as eloquently bred as any. To top it off, she's that "front pasture" kind – an ornament to show off and make your neighbors jealous.

• CONFIRMED PREGNANT DUE 4/21/2021 SIRED BY BFC ITOMORITAKA 25E (FB30174) - LOT 61

W02 PROGENY

Lot 56

If you can't buy the factory, acquire the next best thing, the best product made from the factory. Here are two direct daughters of W02. Plus we add a huge high five of quality with their direct sire being Itoshigenami. We already know that their dam brings an extra level of marbling potential to the table but when we add Itoshigenami to the mix, this is practically front page news! Itoshigenami progeny have and are still breaking selling records around the World including his direct son whose semen still sits as the highest selling semen in the World amongst all breeds selling for \$68,000 per unit. In the Australian BreedPlan his Marble EBV is through the roof while just like "W02" maintain optimum growth potential. They'll open their own gate to the donor pen cause they know what they can throw down

# Polled Genetics

VT MS KIKUNAHANA W02 - DAM OF LOT 58

BAR R POLLED ZURUTANI D64 - SIRE OF LOT 58

Wait...What?!? A polled "W02" and presented in a bull that can spread this amazingness throughout a program in one breeding season? If you aren't pinching yourself, you should be at this moment. You might as well call a stud company and reserve some space – make sure it's a pen suited for royalty because this boy may be more exciting to the World than when Prince William had his son. Their dam "W02" – Lot 55 is the beautifully balanced bred donor who needs no introduction. Their sire is "D64" who is a homozygous polled bull; this marriage squashes all news headlines about Megan and Prince Harry's nuptials. Bar R Polled Zurutani D64 is a son of 52Y. 52Y is the famous sire that has had a son sell for \$80,000, a daughter sell for \$64,000 and just recently had a daughter sell for \$42,500 in the Bar V dispersion sale. In a GrowSafe trial, "D64" ranked #3 in residual feed intake making him a top performing individual. In the Australian BreedPlan, "D64" has fabulous carcass trait EBVs including +2.0 for Ribeye Area and +0.8 for Rump Fat. Lot 58 is polled and ready to help elevate the polled Wagyu population in many ways.

## Lot 59

These two maternal siblings are awesome in many ways. First, Lot 59 is a AA-9 combo where Lot 60 has a Tenderness of a perfect 10. Their dam is a product of Shigeshigetani who has been around for years, considered to be one of the best foundation sires still in use today and also who keeps getting better and better as more data is entered into the AU Breed-Plan. Kitaguni Jr is also relevant in her pedigree as he always is a conductor for some added growth and performance potential. Lot 59's sire is superb balance of growth, maternal and carcass traits while Lot 60's sire is the legendary Itoshigenami whose progeny break selling records around the World including his direct son whose semen still sits as the highest selling semen in the World amongst all breeds selling for \$68,000 per unit. This bull and heifer are what most breeders aim for when their goal is to create balance in their herds.

BFC SANJIROU 40F - SIRE OF LOT 63 EMBRYOS

Full brothers...full of value. Their dam was represented in the last two lots and is a product of Shigeshigetani who has been around for years, considered to be one of the best foundation sires still in use today and also who keeps getting better and better as more data is entered into the AU BreedPlan. Kitaguni Jr is also relevant in her pedigree as he always is a conductor for some added growth and performance potential. They are sired by Itoshigenami whose progeny have and are still breaking selling records around the World including his direct son whose semen still sits as the highest selling semen in the World amongst all breeds selling for \$68,000 per unit. In the Australian BreedPlan his Marble EBV is through the roof. If you need the next Itoshigenami phenom, look to these two prospects as they've got the building blocks to be just that. In Lot 63 we shake it up a bit. Again, we have that stellar super dam "126-15" but this time she's paired with that exciting Hisako (Lot1) and Sanjirou 3 mating. That's right, you get three embryos that bring an all-time record high selling female with a superb pedigree and the number 1 marbling bull of the breed together with the fabulous Shigeshigetani influenced donor that who, as you can see, has done a phenomenal job thus far. Take advantage of these opportunities – you may never see tabulations built as sterling as this again.

It's a family affair here! We've got a superb female and her son (Lots 65) being offered. Plus, in Lot 66 we offer a package of embryos that replicate this impeccable mating. Ladies first of course and with that, you can't go wrong here. Her sire, Shigeshigetani, has been around for years and is considered to be one of the best foundation sires still in use today and also who keeps getting better and better as more data is entered into the AU BreedPlan. Some of the top sires in the US have been sired by Shigeshigetani and only positive carcass results continue to be produced. The maternal side of Lot 64 is interesting to say the least as it is a combo of the total outcross who adds maternal strength and size, 005 Shigefuku 13M and a double bred Kikuyasu 400 dam – again more size plus carcass merit. Her sons are sired by the legendary Itoshigenami whose progeny break selling records around the World including his direct son whose semen still sits as the highest selling semen in the World amongst all breeds selling for \$68,000 per unit. Royally bred and if smart, you'd take them all and keep the family together.

MFC SANJIROU 3-39 - SIRE OF LOT 67

Lot 67

Another product of Lot 64 and maybe the most exciting! Her sire is a double bred Sanjirou. This means he's a double bred superb marbling machine. He sold for \$10,000 back in 2017 and brings the rare Nakagishi 5 to the party as his dam is her direct daughter. His dam, Bar R 57T, sold for \$15,000 back in 2016 and has become famous in the breed as her dam was part of the last importation from the World K group from Japan. She had only 4 offspring in the US and "57T" is one of those calves. The maternal lineage is huge and more importantly, very rare. Lot 67 also brings to the table original female import WK Suzutani not once but three times making this tabulation a maternal must and full of the rare, sought after and important Japanese genetics that everyone would die to have in their pedigrees.

# Itoshigenami 30F

## Lot 72

OK if you're into shaking things up a bit here is your opportunity. Lot 72 is a 3/4 full sibling to the last few lots presented to you. We've got the same powerful dam but the party is happening on the top side of the pedigree. Don't worry, Itoshigenami is still there but mixed with some very exciting components. Lot 72's direct sire is a Bar R Cattle Company bred bull whose dam is a Blue Rock original built by growth genetics in Yasufuku Jr and maternal powerhouse, Metani, who is a direct daughter of Heatherkura herself. Heatherkura is the direct product of original import and marbling queen, Suzutani. In Heatherkura's tabulation we mix an abundant amount of growth and marbling ability from her sire, WK Takazakura who is also a foundation bull. So in turn, we get all the good of "Suzu 915" and Itoshigenami plus so much more.

## Lot 73

Hello foundation genetics. Where do we even begin...? This mother – son offering is littered with exceptional bloodlines. Lot 73, is sired by CHR Takazakura 101L who is a bull known for added growth and superb marbling as he's a son of WK Takazakura who is also a foundation bull that excels in both of these categories. She's also claims royalty because her dam is a direct daughter of Fujiko, a daughter of original import, WK Okutani. She's got plenty of celebrated marbling genetics to cover all the bases and her calf at side carries all this great lineage with the added bonus of extra growth from Itoshigefuji. It's like when you were a kid and were happy with your Happy Meal but then discovered the awesome toy that came with it. She's a great individual plus she's fabulous donor as she has consistently produced 40-50 embryos with at least 35 viable per conventional flush. Put her to work for you today!

CHR TAKAZAKURA 101L - SIRE OF LOT 73

Lot 74

We didn't stop there...the added bonus just gets better and better. Again we have progeny of Lot 73, the female whose pedigree speaks for itself. This we blend with a bit of more growth genetics with Hirashigetayasu found as the direct sire of Lot 74 and the marbling powerhouse with Sanjirou found as the sire of Lot 75. Hirashigetayasu pretty much stamps his progeny; you can pretty much sort them out in a pasture with just your eye as they are larger, deeper sided, bigger boned and just plain fantastic phenotypically. Sanjirou speaks for himself; he was once a top carcass sire and maintains high marbling. Sanjirou's full brother sits as the #1 Marbling bull and carcass maker in the US and their genetic package is seen in some of the best and most consistent pedigrees in the breed.

Lot 76

If you like pretty girls than here is the mother/daughter duo suit for you. The sire of Lot 76 is an outcross to help keep things fresh. "13M" is not seen very often but packs a power punch of maternal ability and physical dimension. The dam of this cow was a leadoff batter in the JW dispersion and on many people's list. She's got that "look" from her grandsire that consistently makes his progeny beautiful; Hirashigetayasu. With the marbling ability and World craze found in Itoshigenami, the sire of Lot 77, you can't go wrong with these two hot to trot girls.

WEBBCO Z278 SHEBA - DAM OF LOT 76

005 SHIGEFUKU 13M - SIRE OF LOT 76

Lot 77

Lot 77 as mentioned is a direct daughter of Lot 76. She brings that extra power punch of growth and maternal ability to this mating from her dam but packs a huge punch of abilities through her direct sire, Itoshigenami. Itoshigenami progeny have and are still breaking selling records around the World including his direct son whose semen still sits as the highest selling semen in the World amongst all breeds selling for \$68,000 per unit. In the Australian BreedPlan his Marble EBV is through the roof. We give you two opportunities to take this remarkable mix of genetics home with you; the female that is just like her mom and GORGEOUS in Lot 77 or the three embryo package in Lot 78. If you were smart, you'd take everything and have some major bragging rights along with some amazing genetics.

BFC YASUFUKU BFE4 - DAM OF LOTS 79 & 80

BFC SANJIROU 3 44F ET - DAM OF LOT 81

We discuss balanced breeding and these two full siblings are a prime example. They exude both growth and marbling ability in their pedigrees. We have the growth influence pushed by their direct sire, Kitaguni Jr while Yasufuku Jr brings in the marbling ability on their maternal side. This is the type of genetics that can change your program. High marbling is great but when your end product doesn't add up too much it takes a while to make ends meet while if you have a large carcass that lacks in quality, you're also not successful. The idea is to make a large carcass with extraordinary marbling as we're in the beef industry and meat is sold by the pound.

OK, if you didn't get your chance to get a piece of that fabulous record high seller donor, Hisako, mixed with the number 1 marbling bull in the country, then he is it. This prospect is as good as they come. First, the bottom of his pedigree is made up of current and royal genetics as possible. The direct sire of this bull is none other than a past top marbling bull in Japan, Kitaguni Jr. Lot 81 is a balanced pedigree; we know he has very potent marbling genetics but he also has a ton of powerful growth genetics to complement the carcass power. This bull has as much potential as any and if you were smart, you'd acquire him now before you have to buy his semen from someone else down the road.

TBR YASUKANEKO 1074X - SIRE OF LOT 82

## Lot 82

Balance, balance, balance...the hardest thing to accomplish in our personal lives and even breeding cattle but it is a successful endeavor here in these two lots. Both are a perfect balance of high marbling genetics and growth genetics. To top it off, Lot 82 is an AA-7 combo and Lot 83 has an almost perfect Tenderness of 9. These two girls, bred differently, are as balanced as any and the type and kind any breeder should be on the search for.

MFC SANJIROU 3-39 - SIRE OF LOTS 84 & 85

Lot 84

BFC ICHIRO 1 - DAM OF LOT 85

Lot 85

The paternal sisters are sired by "3-39" who sold for \$10,000 back in 2017 and brings the rare Nakagishi 5 to the party as his dam is her direct daughter. His dam, Bar R 57T, sold for \$15,000 back in 2016 and has become famous in the breed as her dam was part of the last importation from the World K group from Japan. She had only 4 offspring in the US and "57T" is one of those calves. The maternal lineage is huge and more importantly, very rare. Lot 84 brings to the party a very balanced pedigree with foundation sire, Kikuyasu 400 and a Sanjirou/Takazakura (marbling married with growth) combo on her maternal side. Lot 85 adds some sparkle to the mix with her AA-10 combo making these paternal sisters hot commodities.

Lot 87

DTR FUKUTAKKURA - DAM OF LOTS 86 & 87

HLW KIKUYASU AA10 - SIRE OF LOT 86

Both are AA-10 combos and both are maternal siblings; one hell of a dam here. Their dam has a double dose of CHR Michisuru 089L as well with Takazakura (great foundation sire known for extreme marbling ability). She's quite the donor dam and in these two calves she's paired with her direct sire and a high selling AA-10 combo bull. The sire of Lot 86 made waves when he sold for \$10,000. This bull turned everyone's heads as he'd bred for optimum marbling but his phenotype is as powerful as any. These two individuals bring maximum quality to the table and should be on everyone's list come sale day.

*Lot 88*

*Lot 89*

Again, another set of maternal siblings to exhibit how strong of producers the dams are in this offering. She is a mix of CHR Michisuru 089L and marbling king "068". Lot 89 who's an AA -10 combo brings to the mix CHR Michisuru 089L as well with Takazakura in her direct sire. This only helps to solidify the positive influence that these bulls bring to the mix. Lot 88 is sired by Hirashigetayasu who for many is on the "favorite sire" list as he adds growth and performance and beautiful phenotype to his progeny while not taking away carcass merit. Lot 88 is also sitting pretty with an AA-9 combo and one fantastic bull to add value to your program in one breeding season. And when we talk about being proven, this mating is as this is the same mating that produced the 3rd overall champion in a professional taste panel and fifth overall champion in the Warner-Bratzler Shear Force for Tenderness test in the 2019 Triple Crown Steak Challenge.

- F11C

Lot 90

Lot 91

The dam pedigrees represented in these three females are almost identical. They are a classic example of balanced breeding of both growth and marbling genetics. The sire of Lot 90 is a sought after foundation sire who has semen sell for \$1000 and more per unit in past auctions. This sire will add size, Ribeye and overall performance and maternal ability. The same goes for the sire in Lots 91 and 92 full siblings. Hirashigetaysu does this and more as he's known to create progeny that stops people in their tracks stamping them with phenomenal phenotype.

MFC ITOMORITAKA 0-41 - SIRE OF LOTS 94 & 96

*Lot 93*

*Lot 94*

Maternal sisters are here and ready to show you what they've got! Lot 93 is an AA-10 combo; the best possible. She's sired a high growth sire as his building blocks all lead down the high performing path. Lot 94 sits pretty in SCD with an AA and is sired by a bull that sold for \$6000 to a program that has been around longer than most and that help solidify the Wagyu breed in the US, Ultimate Kobe Beef – UKB. They know quality and "0-41" has is all wrapped up into a balanced pedigree. Their dam is a Yojimo daughter who is known for superior carcass quality and a top seller of the Lone Mountain Cattle Company sale. With Michifuku present on the bottom of her pedigree, you can rest assured that she's got all the marbling power behind that one will ever need. Also note, "1024" is only suited for an IVF program where she excels averaging 20 embryos.

## Lot 95

Lot 95 is sired by the international "it bull", Itoshigenami. His progeny have and are still breaking selling records around the World including his direct son whose semen still sits as the highest selling semen in the World amongst all breeds selling for \$68,000 per unit. In the Australian BreedPlan his Marble EBV is through the roof. The steadiness of this pedigree is assisted with the influence of growth influencer, Hirashigetayasu on the bottom of her pedigree. Along with Hirashigetayasu we have who may be considered the most influential sire of the breed and who keeps getting more powerful in BreedPlan as data flows in, Shigeshigetani! The dam herself has been very celebrated as her progeny has topped past auctions. Lot 96's sire sold for \$6000 to a program that has been around longer than most and that help solidify the Wagyu breed in the US, Ultimate Kobe Beef - UKB. They know quality and "0-41" has is all wrapped up into a balanced pedigree. The dam featured in the Lot 96 pedigree is a traditionally balanced tabulation plus Lot 96 is a AA-9 combo making these females as good as any.

Lot 97

Lot 98

All good things must come to an end and we end this party with superb individuals. Lot 97 is a AA-9 combo. The sire of Lot 97 is built from huge marbling genetics as Kitateruyasudo is the former #4 Marbling sire in the US while carrying above par growth and Sanjirou whose full brother is currently the #1 Marbling sire in the US. We add the original Itozuru Doi who's a composite foundation sire and when he's present in embryo matings they typically sell for over \$1000 per embryo. Also present is a daughter of Suzutani to add some royalty to this already all-star guest list. Lot 98 is a classic balance in genetics on both the top and bottom of her pedigree. She sells with her calf that is sired by the great Itoshigenami son found in Lot 72.

# success from *pasture to plate*

---

IMPECCABLE is the Bowman Farms aim when it comes to the animals out on the pasture to the finished product on the plate. Starting with only the best to finish as the best; great genetics and proper management ends in an award winning finale.
